

A Divya Bharathi

UI/UX Designer

Hi, I'm Divya Bharathi, a UI/UX Designer with nearly 3 years of experience designing intuitive, user-centered, and responsive digital products. I specialize in UX research, wireframing, user flows, interactive prototyping, and high-fidelity UI design using Figma. I enjoy solving complex user problems through design thinking, usability testing, and iterative design processes to create seamless user experiences.

Education

2020 - 2023

Bachelor of electronics communication

Malla Reddy Engineering College For Women

2018 - 2022

Skills

- UI/UX
- User research
- Wireframes
- Prototyping
- User Flows
- Visual design
- Usability testing
- Process Flows

Language

English

Telugu

Experience

2022 - 2025

Brane Enterprises Private Limited (Full Time)

Ui/Ux designer

- Employee Management application is a responsive web application designed to simplify employee management workflows, including employee records, attendance tracking, leave management, and performance monitoring.
- I followed a user-centered design approach by understanding user needs, identifying pain points, creating user flows, wireframes, and interactive prototypes in Figma before designing high-fidelity interfaces.
- I focused on improving usability, simplifying navigation, maintaining design consistency through reusable UI components, and ensuring a responsive experience across devices.
- I collaborated with developers during implementation and refined the design based on feedback to deliver an intuitive, efficient, and seamless user

2025

Dophera (Internship)

Ui/ux designer

- Parcel Delivery Application is a peer-to-peer logistics platform that connects senders with travelers who are already traveling on the same route, making parcel delivery more convenient and cost-effective.
- I followed a user-centered design approach by understanding the needs of both user groups, identifying pain points, and designing an end-to-end user experience.
- I created user flows, wireframes, and interactive prototypes in Figma to simplify the parcel booking process.
- The sender can search for travelers based on their destination, submit parcel details, and send a delivery request.
- Travelers can create travel listings by providing travel details, uploading travel proof, specifying luggage capacity, and reviewing incoming delivery requests.
- The application also includes in-app chat for price negotiation, real-time parcel tracking, and delivery notifications, ensuring a transparent and seamless experience for both users.
- I focused on intuitive navigation, responsive design, usability, and creating a smooth interaction between senders and travelers.
